Swedish - native

English - professional

CERTIFICATION

Palo Alto Networks

Cybersecurity Foundation (2026)

PROFILE

Software developer with a diploma in frontend development and web security, and hands-on experience building AI tools for Nordic financial operations. Brings together web and backend development, security awareness and experience from security-sensitive datacenters. Turns operational needs into useful digital solutions.

EXPERIENCE

Digital Kontakt - Google Partner

Oct 2025 - Present

Digital Solutions Specialist & Account Manager

- Handle daily customer contact and consultative sales for businesses and individuals.
- Identify customer needs, recommend solutions and follow up on sales opportunities.
- Contribute to web development, AI automation and technical integrations.

BMW Financial Services Northern Europe

Apr 2025 - Sep 2025

AI Innovation Trainee

- Built and launched three internal AI applications supporting Operations teams across Sweden, Norway and Denmark.
- Developed document-grounded retrieval workflows designed to give answers aligned with internal guidelines.
- Worked with Nordic Operations stakeholders to identify recurring challenges and improve workflows.

Rapid Säkerhet

2018 - 2025

Security Officer - Datacenter

- Worked in datacenters and public environments requiring access awareness, incident assessment and accountability.
- Coordinated with police, emergency services and other stakeholders during operational incidents.

Folkets Husby

2019 - 2025

Digital Development & Democracy Ambassador

- Supported website development, digital tools and improvements to internal workflows.
- Led workshops for young people on democracy, civic participation and ways to strengthen their influence.
- Contributed to board work and the organisation's wider digital needs.

CLIENT & AI PROJECTS

Jubba Restaurang - Client Website

2026

Built a website for restaurant, catering and events, featuring menus and a customer enquiry form.

jubbarestaurang.se

Zeila Food - Client Website

2026

Designed and developed a customer-facing website for a food business.

zeilafood.com

UniChat - AI Study Advisor

2026

Built a full-stack AI study adviser with retrieval-based recommendations.

github.com/bendarte/uni-chat

EDUCATION

JENSEN Yrkeshögskola | 2023 - 2025

Frontend Developer, Web Security | 400 YH credits

Thesis: security risks and GDPR considerations in React applications.
